

Analysis of the Project in Assignment 2.

6. The earliest finish date for this project is **08/17/16** if it is scheduled to start on 02/29/16.

7. The earliest finish date for the project in Assignment 1 is 10/20/16 if it is scheduled to start on 2/15/16.

It is **NOT feasible** to complete this project two weeks after the completion date I identified for the previous project as the earliest finish dates have the difference more than 60 days. New project will be completed before previous project.

9. The resources are allocated in both the projects such that they do not conflict. The resources those complete their task in previous project are assigned in the new project or some of the unused resources in the previous project and new project's own resources are allocated in the new project.
